THE Battle Staff SMARTbook

Guide to Designing, Planning & Conducting Military Operations

This is the **third revised edition** of The Battle Staff SMARTbook, incorporating the **2010 edition of FM 5-0, The Operations Process**. In addition to the introduction of **design**, the 2010 revision of FM 5-0 builds on and expands the body of doctrine associated with full spectrum operations described in the 2008 edition of FM 3-0, Operations.

Moving beyond planning and orders production, FM 5-0 holistically addresses **planning, preparation, execution, and assessment** in the continuous cycle of the operations process.

The **operations process**, while simple in concept, is dynamic in execution. Commanders and staffs use the operations process to integrate numerous processes and activities consisting of hundreds of tasks executed throughout the headquarters. At the center of the operations process is **battle command** — the art and science of understanding, visualizing, describing, directing, leading, and assessing forces to accomplish missions.

Completely Updated and Aligned with the 2010 Edition of FM 5-0!
