THE Sustainment & Multifunctional Logistician's SMARTbook

Warfighter's Guide to Logistics, Personnel Services, & Health Services Support

Sustainment is the provision of logistics, personnel services, and health services support necessary to support full spectrum operations until mission accomplishment. The provision of sustainment is an integrated process (people, systems, materiel, health services, and other support) inextricably linked to operations.

From a strategic perspective sustainment builds combat readiness, delivers a combat ready force to the combatant commander as part of the joint force, and maintains combat power and endurance across the depth of the operational area. Logisticians today must be prepared to conduct a wide-ranging array of concurrent operations to support deployment, employment, sustainment, redeployment, and reconstitution.
