## THE Stability, Peace & Counterinsurgency SMARTbook

### Nontraditional Approaches in a Dynamic Security Environment

In the complex, dynamic strategic environment of the 21st century, achieving victory will assume new dimensions as we strengthen our ability to generate "soft" power to address root causes of conflict.

At the heart of this effort is a comprehensive approach to **stability operations** that integrates the tools of statecraft with our military forces, international partners, humanitarian organizations, and the private sector.

**Counterinsurgency operations** require military forces to employ a mix of familiar combat tasks and skills more often associated with nonmilitary agencies and to be nation builders as well as warriors.

**Civil-military operations** are a primary military instrument to synchronize military and nonmilitary instruments of national power, particularly in support of stability, counterinsurgency and other operations dealing with asymmetric and irregular threats.
